

KIWO POLYCOL® DRY-TOUCH

A fast-exposing, pre-sensitized SBQ-photopolymer emulsion for textile printing with plastisol and silicone inks and graphics printing with UV and mild solvent-based inks.

Product benefits

- Tack-free surface won't stick to inkjet film positives
- Good choice for humid environments
- Teal color provides high transparency for easy see-through registration
- Compatible with both light-based (LED, laser and conventional UV) and inkjet Computer-to-Screen imaging systems
- High solids for quick build-up and smooth stencils
- Excellent resolution and exposure latitude
- High mechanical resistance
- Easy reclaiming

KIWO POLYCOL® DRY-TOUCH

KIWO POLYCOL® DRY-TOUCH is convenient to use, as it is pre-sensitized with SBQ, which means no measuring or mixing like with diazo-sensitized emulsions. It also has minimal or no haze often associated with diazo emulsions.

KIWO POLYCOL® DRY-TOUCH has a long shelf/ pot life as well as a long coated screen storage life. KIWO POLYCOL® DRY-TOUCH doesn't lock-in after treated with solvent as with other textile-grade SBQ emulsions.

PHYSICAL PROPERTIES:

Viscosity:	approx.: 9,000 mPas
Solids Content:	approx.: 41%
Color:	Teal
Storage:	18 months at 68°F/20°C
Packaging:	1 Quart, 1 Gallon, 5 Gallons
