Product Manager

KIWO POLYCOL® MULTI-TEX™ is a high solids, fast exposing, pure photopolymer emulsion specially formulated for use with all of the newest textile inks, optimized for use on the newest Computer-to-Screen imaging & LED exposing systems as well as for all conventional exposure systems.

KIWO POLYCOL® MULTI-TEX™ provides the following attributes:

- Time, labor & materials savings means faster turnaround times
- Excellent resolution mesh bridging and edge definition
- Won't remove image from Inkjet film positives
- Won't lock-in with solvent cleaners

## For Plastisol

Resistant to all plastisols including phthalate-free & PVC free systems

### Saves time

- Builds quickly
- Exposes quickly
- Develops easily
- Reclaims easily

### Less down time

- Excellent durability
- Great ink release means fewer screen cleanings

## For Water-base & Discharge

Resistant to all water-base, co-solvent HSAs & discharge inks

### Saves time

- No waiting for mixing/de-gassing
- No time wasted applying, drying & curing hardeners

### Save labor & material costs

- No hardeners required
- No diazo additives needed
