## KIWOCOL<sup>®</sup> POLY-PLUS HWR

*Highest Water Resistance*

**KIWOCOL<sup>®</sup> POLY-PLUS HWR** produces a **H**ighly **W**ater **R**esistant stencil designed for use with water-based inks in long run applications. Due to its high mechanical and abrasion resistance, **KIWOCOL<sup>®</sup> POLY-PLUS HWR** is also ideal for ceramic inks as well as roll to roll printing of wallpaper, rugs, glass and other abrasive substrates. It can be chemically hardened with KIWO'S HARDENER K to create a permanent stencil.

- High solids – 43%
- Quick emulsion build up with very good stencil smoothness
- Excellent copying properties (resolution, edge definition, and mesh bridging)
